Membership Letter

The following letter regarding several prominent issues now before the public, in which they are clearly explained, has been sent to the members of the Norwich chamber of commerce by Secretary John J. O'Rourke:

The conclusions of your committee, after much study, are as follows: An equitable system of real estate assessments prevails, which should be revised and based upon fairness to all property owners. The assessors are not doing their work efficiently. The first requisite is an assessment map. Such a map should be drawn to scale; indicate the areas and owners of all real estate property within the limits of the town of Norwich.

This would entail an accurate survey of all property at an estimated cost of \$25,000 to \$30,000. This price is prohibitive at present, though it would justify the expenditure in a few years. As an alternative, the American Service Corporation of Springfield, Massachusetts, have signified a willingness to produce the basis of an assessment map, by taking aerial pictures, covering the entire area of the town at an estimated cost of \$5,000. This map would be furnished in sections, of the most thickly settled area on a scale of fifty feet to the inch, and tracings in sections of the balance of the town on a scale of two hundred feet to the inch. All tracings will show buildings, walls, fences, woods, roads, etc. These tracings would be accurate to within one per cent. of a precision survey. The assessors could then have plotted on these maps all available boundaries, the records of which are incomplete. The result would indicate to what extent additional data would be required to make a complete assessment map. In the minds of your committee, this is the desirable first step to the acquisition of an efficient assessment map at a minimum cost.

Medical Inspection of School Children

Your attention is called to the serious physical condition of our school children, as indicated in the health survey.

PLAINFIELD CITIZENS TO HEAR

(Special to The Bulletin)
Plainfield, Oct. 10.—Tuesday evening at 8 o'clock at the Community house in Plainfield the citizens are to gather to consider plans for a new school building for the town, one year since Plainfield established a high school in a school building at Central Village and the students now registered for courses in the high school are crowded.

so much so, in fact, that the numbers of other young people who would attend the high school if accommodations for them were available are excluded.

This situation has not escaped that attention of the school officials and other thinking citizens of the town, so steps have been taken under which plans for a proposed building have been prepared and this plan will be presented and explained Tuesday evening's meeting by William T. Towne of New York, the architect who prepared the plans for the Plainfield school at Norwich.

At the week end John B. Chapman, superintendent of schools in Plainfield, will make a preliminary report on the school situation and the citizens will be given an opportunity to express their opinions on the proposed building. The discussion will be held at 8 o'clock at the Community house in Plainfield.

REASONS AND EXCUSES

Y. M. C. A. MEETING TOPIC
A real interest developed at the weekly Y. M. C. A. meeting at the local Y. M. C. A. Sunday afternoon when a goodly number of men assembled.

After the singing of several popular hymns, the Scripture reading and prayer a discussion was conducted on the topic, Reasons and Excuses.

The general secretary opened the discussion and many of those in the audience participated. The following are some of the points that were brought out: That the difference between a reason and an excuse is often the difference between honesty and the opposite of honesty. Private was quoted as one who endeavored to give a reason for his action in giving up Christ to be crucified, but his reason was only an excuse. The reasons given by those of Bible in the banquet were very flimsy, and nothing but foolish excuses. At times when men are asked to cooperate to crush an evil in the community, they refuse and attempt to give a reason for their refusal, when really it is an excuse and a poor one at that. Oftentimes when a man is asked to perform a duty in the church or Sunday school, he begs off and at-

tempts to give his reason for the refusal, but in the last analysis his so-called reason is simply an excuse; many times he could do the job if he would.
